Questions and answers are based on and/or copied from The Scrum Guide™ © 2020 Ken Schwaber and Jeff Sutherland

Please note that you should only choose one answer to be the best answer, unless "Choose all that apply." is mentioned.

Question 1:

How much work should the Developers carry out on a Product Backlog item selected for a Sprint?

Options:

1. As much as is needed to meet the Definition of Done
2. As much work as fits in the Sprint
3. The best that can be done keeping in mind that it is not possible for the QA to complete all of the testing
4. Analysis, design, programming, testing and documentation

Question 2:

When multiple Scrum Teams work on the same product, what should they share? Choose all that apply.

Options:

1. Scrum Master
2. Product Owner
3. Product Backlog
4. Product Goal
5. Sprint Goal
6. Sprint Backlog
7. Sprint Plan
8. Definition of Done

Question 3:

How is the Product Backlog ordered?

Options:

1. Small items placed at the top and large items at the bottom
2. Fragile items placed at the top and non-fragile items at the bottom
3. Scrum does not prescribe how the Product Backlog should be ordered
4. Based on what the stakeholders think are the most valuable items

Question 4:

When is a Sprint over?

Options:

1. When all Product Backlog items meet their Definition of Done
2. When the Product Owner announces that it is done
3. When all the given tasks are completed
4. When the timebox has expired

Question 5:

Why is it recommended to carry out the Daily Scrum at the same place and time?

Options:

1. So that the place can be named
2. The Product Owner wants it
3. Other places are difficult to book
4. It reduces complexity and overhead

Question 6:

Who is accountable for maximizing the value of the product?

Options:

1. Scrum Master
2. Product Owner
3. All members of the Scrum Team
4. All Developers

Question 7:

The Sprint Goal is the single objective for the Sprint. Although the Sprint Goal is a commitment by the Developers, it provides flexibility in terms of the exact work needed to achieve it. The Sprint Goal also creates coherence and focus, encouraging the Scrum Team to work together rather than on separate initiatives. Based on this, which of the following statements is **FALSE**?

Options:

1. During the Sprint scope may be clarified and renegotiated with the Product Owner as more is learned
2. The Sprint Backlog and its content are fully formulated in the Sprint Planning and do not change during the Sprint
3. The Sprint Backlog is updated throughout the Sprint as more is learned
4. If the work turns out to be different than expected, the Developers collaborate with the Product Owner to negotiate the scope of the Sprint Backlog

Question 8:

When can an Increment be delivered to stakeholders?

Options:

1. Only at the end of a Sprint, after the Sprint Retrospective
2. Only at the end of a Sprint, but it is allowed to deliver the increment after the Sprint Review and before the Sprint Retrospective
3. An Increment may be delivered to stakeholders prior to the end of the Sprint, but only when an automated Continuous Deployment pipeline is in place
4. An Increment may be delivered to stakeholders prior to the end of the Sprint

Question 9:

What does Product Backlog management include?

Options:

1. Helping to establish empirical product planning for a complex environment
2. Helping the Scrum Team understand the need for clear and concise Product Backlog items
3. Helping to find techniques for effective Product Goal definition and Product Backlog management
4. Ordering the items in the Product Backlog

Question 10:

Who is accountable for managing the Product Backlog?

Options:

1. Product Owner
2. Developers
3. Scrum Master
4. Member of the Scrum Team

Question 11:

When can a Sprint be cancelled?

Options:

1. When it is clear at the end of a Sprint that not everything can be completed
2. When the Developers feel that the work is too difficult to be carried out
3. When the sales margins start to fall
4. When the Sprint Goal becomes obsolete

Question 12:

Who is accountable for managing the items in the Product Backlog?

Options:

1. Product Owner
2. The complete Scrum Team
3. Scrum Master
4. Developers

Question 13:

During an ongoing Sprint, the CEO of the company asks one of the Developers to add a very important item to the current Sprint. What should the Developer do?

Options:

1. Add the item to the current Sprint without any adjustment
2. Add the item to the Sprint and drop an item of an equal size
3. Add the item to the next Sprint
4. Inform the Product Owner so that he/she can work with the CEO

Question 14:

Who is responsible for delivering Done increments?

Options:

1. The Scrum Team as a whole
2. The Developers
3. The Product Owner and the Scrum Master
4. The Product Owner and the Project Manager

Question 15:

Which of the following events may bring about a change in the Product Backlog? Choose all that apply.

Options:

1. Changes in the Scrum Team
2. Changes in the business requirements
3. Changes in the market conditions
4. Changes in technology

Question 16:

Which of the following roles ensures that the Scrum Team adheres to the Sprint and causes the removal of any impediments to the Scrum Team's progress?

Options:

1. Product Owner
2. Product Manager
3. Scrum Master
4. Project Manager

Question 17:

During the Sprint Planning, the assigned workload is getting greater than the team's capacity. Which of the following actions should be taken? Choose all that apply.

Options:

1. Cancel the Sprint
2. Ask the Developers to work overtime for this Sprint and promise that it won't happen again
3. Start the Sprint and recruit additional Developers
4. Collaborate with the Product Owner and remove or change items
5. Alert the Product Owner, start the Sprint and monitor burn-down

Question 18:

Who determines how much of the Product Backlog will be selected for the Sprint?

Options:

1. Scrum Master
2. Product Owner
3. Developers
4. Scrum Team

Question 19:

What are the ways in which the Scrum Master serves the Product Owner? Choose all that apply.

Options:

1. Helping to find techniques for effective Product Goal definition and Product Backlog management
2. Helping the Product Owner create high-value products
3. Helping to establish empirical product planning for a complex environment
4. Planning and advising Scrum implementations within the organization

Question 20:

Which of the following activities (during a Sprint) would require the participation of the Product Owner? Choose all that apply.

Options:

1. Answer questions from the Developers about items in the current Sprint
2. Provide feedback
3. Run the Daily Scrum
4. Work with the stakeholders
5. Update the Sprint burn-down
6. Prioritize the activities for the Developers

Question 21:

The Product Owner's accountabilities can best be described as:

Options:

1. Optimizing the Return on Investment (ROI) and the Total Cost of Ownership (TCO) of the work the Scrum Team does
2. Keeping stakeholders at a distance
3. Directing the Developers
4. Managing the project and ensuring that the work meets the commitments to the stakeholders

Question 22:

Who is accountable for creating a valuable, useful Increment every Sprint?

Options:

1. Product Owner
2. Scrum Master
3. Scrum Team
4. Developers

Question 23:

Which of the following statements are true about Scrum Events? Choose all that apply.

Options:

1. All Scrum events are timeboxed
2. All Scrum events are monitored by the Scrum Master
3. The events are held at the end of a Sprint
4. The maximum durations of the events are fixed

Question 24:

When does a new Sprint start?

Options:

1. Immediately after the conclusion of the previous Sprint
2. Just before the current Sprint can conclude
3. When the Scrum Master feels that the current Sprint is complete
4. After the Sprint Review has taken place

Question 25:

Which of the following statements is true about a Sprint?

Options:

1. No changes are made that would endanger the Sprint Goal
2. Quality does not decrease
3. Scope may be clarified and re-negotiated with the Product Owner as more is learned
4. All of the above

Question 26:

What is a Sprint Review?

Options:

1. Review of team's activities in the Sprint
2. Review held at the end of the Sprint to inspect the outcome of the current Sprint and determine future adaptations
3. Demonstrations held at the end of the Sprint for the stakeholders to provide feedback
4. Appraise of the work done on the Sprint to either reward or punish the Developers for completing the Sprint

Question 27:

In which case do the Product Owner or Scrum Master attend the Daily Scrum?

Options:

1. Always
2. Never
3. They can choose for themselves
4. When they are actively working on items in the Sprint Backlog

Question 28:

When can the Developers volunteer to own a Sprint Backlog item?

Options:

1. A Developer can never own a Sprint Backlog Item
2. Whenever a Developer is able to accommodate more work
3. During the Daily Scrum
4. During the Sprint Planning

Question 29:

How many members should there be in a Scrum Team?

Options:

1. Always three to nine
2. Typically ten or fewer
3. Never more than ten
4. Never less than five

Question 30:

What are the inputs of the Sprint Planning? Choose all that apply.

Options:

1. Product Backlog
2. Latest product Increment
3. Projected capacity of the Developers
4. Past performance of the Developers

Question 31:

Which of the following of the statements best describes the Product Backlog?

Options:

5. It is an emergent, ordered list of what is needed to improve the product
6. It provides just enough information to enable a Scrum Team to start the design phase of a product
7. It is baselined to follow change management processes
8. It contains all foreseeable tasks and requirements from which the Scrum Team can develop and maintain a complete project plan

Question 32:

What is the maximum duration of a Sprint Review?

Options:

1. Two hours
2. Four hours
3. As long as required
4. One day

Question 33:

Who is accountable for establishing Scrum as defined in the Scrum Guide ?

Options:

1. Product Owner
2. Product Manger
3. Scrum Master
4. Developers

Question 34:

What is the role of management in Scrum?

Options:

1. Monitor staffing levels of the Developers
2. Monitor the productivity of the Developers
3. There is no role of management described in Scrum
4. Identify and remove people that aren't working hard enough

Question 35:

What are the three empirical Scrum pillars? Choose all that apply.

Options:

1. Transparency
2. Inspection
3. Adaptation
4. Evaluation

Question 36:

What is a Sprint Goal? Choose all that apply.

Options:

1. It is the single objective for the Sprint
2. It provides flexibility in terms of the exact work needed to achieve it
3. It is updated throughout the Sprint as more is learned
4. It is the set of Product Backlog items selected for the Sprint

Question 37:

What contributes to the value of an Increment? Choose all that apply.

Options:

1. Sum of the value of all the Product Backlog items completed during a Sprint
2. The value of the Increments of all previous Sprints
3. The list of Product Backlog items selected for a Sprint
4. How the Product Owner proposes to accomplish the Sprint

Question 38:

Which of the following Scrum roles selects the items from the Product Backlog to be included in the current Sprint?

Options:

1. Product Owner
2. Scrum Team
3. Scrum Master
4. Developers

Question 39:

Which of the following statements is true about the Product Backlog?

Options:

1. Ordered list of everything that might be needed in the product
2. Single source of requirements for any changes to be made to the product
3. It is never complete
4. All of the above

Question 40:

The Product Backlog is dynamic in nature.

Options:

1. True
2. False

Question 41:

Which one of the following statements is true?

Options:

1. Inspection enables Transparency
2. Inspection enables Adaptation
3. Transparency enables Adaptation
4. Inspection enables Transparency

Question 42:

What does Scrum rely on?

Options:

1. Transparency
2. Demands
3. Decisions
4. Risks

Question 43:

Who modifies the Sprint Backlog?

Options:

1. Developers
2. Scrum Master
3. Project Manager
4. Product Owner

Question 44:

Which of the following statements are true about the Sprint Retrospective? Choose all that apply.

Options:

1. Discusses what went well during the Sprint
2. Identifies impediments to development for removal
3. Occurs after the Sprint Review and prior to the next Sprint Planning
4. A four-hour timeboxed event for one-month Sprints

Question 45:

Of which parts does a Sprint Backlog consist? Choose all that apply.

Options:

1. Sprint Goal
2. Product Goal
3. Product Backlog items selected for the Sprint
4. Plan for delivering the selected Product Backlog items

Question 46:

Which of the following Scrum Team members collaborate to refine the Product Backlog?

Options:

1. Scrum Master and Developers
2. Scrum Master, Product Owner and Developers
3. Product Owner and Developers
4. Scrum Master and Product Owner

Question 47:

Which of the following roles is responsible for the estimates in the Product Backlog?

Options:

1. Product Owner
2. Scrum Master
3. Developers
4. The complete Scrum Team

Question 48:

Which role(s) is/are planning the work needed to create an Increment that meets the Definition of Done?

Options:

1. Developers
2. Developers and Product Owner
3. Product Owner
4. Developers, Product Owner and Scrum Master

Question 49:

How much work should the team plan on spending on a particular Product Backlog item?

Options:

1. As determined by the Definition of Done
2. Design and development
3. Design, development and testing
4. Design, development, testing and documentation

Question 50:

Which is NOT one of the Scrum Values?

Options:

1. Commitment
2. Focus
3. Transparency
4. Respect

Question 51: Which part of the Sprint Backlog relates to the question "Why is this Sprint Valuable"?
Options: 1. Sprint Goal 2. Set of Product Backlog items selected for the Sprint 3. Actionable plan for delivering the Increment 4. Product Goal

Question 52: Each Scrum artifact contains a commitment to ensure it provides information that enhances transparency and focus against which progress can be measured. Which commitment is related to the Product Backlog?
Options: 1. Product Goal 2. Sprint Goal 3. Definition of Done

Question 1: How much work should the Developers carry out on a Product Backlog item selected for a Sprint?
Options: 1. As much as is needed to meet the Definition of Done 2. As much work as fits in the Sprint 3. The best that can be done keeping in mind that it is not possible for the QA to complete all of the testing 4. Analysis, design, programming, testing and documentation
Correct Answer: 1. As much as is needed to meet the Definition of Done
Feedback: The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. The moment a Product Backlog item meets the Definition of Done, an Increment is born. The Definition of Done creates transparency by providing everyone a shared understanding of what work was completed as part of the Increment. If a Product Backlog item does not meet the Definition of Done, it cannot be released or even presented at the Sprint Review. Instead, it returns to the Product Backlog for future consideration.

Question 2:

When multiple Scrum Teams work on the same product, what should they share? Choose all that apply.

Options:

1. Scrum Master
2. Product Owner
3. Product Backlog
4. Product Goal
5. Sprint Goal
6. Sprint Backlog
7. Sprint Plan
8. Definition of Done

Correct Answer:

2. Product Owner
3. Product Backlog
4. Product Goal
8. Definition of Done

Feedback:

If Scrum Teams become too large, they should consider reorganizing into multiple cohesive Scrum Teams, each focused on the same product. Therefore, they should share the same Product Goal, Product Backlog, and Product Owner.

If there are multiple Scrum Teams working together on a product, they must mutually define and comply with the same Definition of Done.

Question 3: How is the Product Backlog ordered?
Options: 1. Small items placed at the top and large items at the bottom 2. Fragile items placed at the top and non-fragile items at the bottom 3. Scrum does not prescribe how the Product Backlog should be ordered 4. Based on what the stakeholders think are the most valuable items
Correct Answer: 3. Scrum does not prescribe how the Product Backlog should be ordered
Feedback: Scrum is simple. Try it as is and determine if its philosophy, theory, and structure help to achieve goals and create value. The Scrum framework is purposefully incomplete, only defining the parts required to implement Scrum theory. Scrum is built upon by the collective intelligence of the people using it. Rather than provide people with detailed instructions, the rules of Scrum guide their relationships and interactions. Various processes, techniques and methods can be employed within the framework. Scrum wraps around existing practices or renders them unnecessary. Scrum makes visible the relative efficacy of current management, environment, and work techniques, so that improvements can be made.

Question 4: When is a Sprint over?
Options: 1. When all Product Backlog items meet their Definition of Done 2. When the Product Owner announces that it is done 3. When all the given tasks are completed 4. When the timebox has expired
Correct Answer: 4. When the timebox has expired
Feedback: A Sprint is over when the timebox expires.

Question 5: Why is it recommended to carry out the Daily Scrum at the same place and time?
Options: 1. So that the place can be named 2. The Product Owner wants it 3. Other places are difficult to book 4. It reduces complexity and overhead
Correct Answer: 4. It reduces complexity and overhead
Feedback: The Daily Scrum should be carried out at the same place and at the same time because consistency reduces complexity and other overheads.

Question 6: Who is accountable for maximizing the value of the product?
Options: 1. Scrum Master 2. Product Owner 3. All members of the Scrum Team 4. All Developers
Correct Answer: 2. Product Owner
Feedback: The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. How this is done may vary widely across organizations, Scrum Teams, and individuals.

Question 7:

The Sprint Goal is the single objective for the Sprint. Although the Sprint Goal is a commitment by the Developers, it provides flexibility in terms of the exact work needed to achieve it. The Sprint Goal also creates coherence and focus, encouraging the Scrum Team to work together rather than on separate initiatives. Based on this, which of the following statements is **FALSE**?

Options:

1. During the Sprint scope may be clarified and renegotiated with the Product Owner as more is learned
2. The Sprint Backlog and its content are fully formulated in the Sprint Planning and do not change during the Sprint
3. The Sprint Backlog is updated throughout the Sprint as more is learned
4. If the work turns out to be different than expected, the Developers collaborate with the Product Owner to negotiate the scope of the Sprint Backlog

Correct Answer:

2. The Sprint Backlog and its content are fully formulated in the Sprint Planning and do not change during the Sprint

Feedback:

The Sprint Goal is created during the Sprint Planning event and then added to the Sprint Backlog. As the Developers work during the Sprint, they keep the Sprint Goal in mind. If the work turns out to be different than they expected, they collaborate with the Product Owner to negotiate the scope of the Sprint Backlog within the Sprint without affecting the Sprint Goal.

Question 8:

When can an Increment be delivered to stakeholders?

Options:

1. Only at the end of a Sprint, after the Sprint Retrospective
2. Only at the end of a Sprint, but it is allowed to deliver the increment after the Sprint Review and before the Sprint Retrospective
3. An Increment may be delivered to stakeholders prior to the end of the Sprint, but only when an automated Continuous Deployment pipeline is in place
4. An Increment may be delivered to stakeholders prior to the end of the Sprint

Correct Answer:

4. An Increment may be delivered to stakeholders prior to the end of the Sprint

Feedback:

Multiple Increments may be created within a Sprint. The sum of the Increments is presented at the Sprint Review thus supporting empiricism. However, an Increment may be delivered to stakeholders prior to the end of the Sprint. The Sprint Review should never be considered a gate to releasing value.

Question 9:

What does Product Backlog management include?

Options:

1. Helping to establish empirical product planning for a complex environment
2. Helping the Scrum Team understand the need for clear and concise Product Backlog items
3. Helping to find techniques for effective Product Goal definition and Product Backlog management
4. Ordering the items in the Product Backlog

Correct Answer:

4. Ordering the items in the Product Backlog

Feedback:

Product Backlog management includes ordering the items in the Product Backlog. All other answers refer to services of the Scrum Master to the Product Owner.

Question 10:

Who is accountable for managing the Product Backlog?

Options:

1. Product Owner
2. Developers
3. Scrum Master
4. Member of the Scrum Team

Correct Answer:

1. Product Owner

Feedback:

The Product Owner is accountable for effective Product Backlog management.

Question 11:

When can a Sprint be cancelled?

Options:

1. When it is clear at the end of a Sprint that not everything can be completed
2. When the Developers feel that the work is too difficult to be carried out
3. When the sales margins start to fall
4. When the Sprint Goal becomes obsolete

Correct Answer:

4. When the Sprint Goal becomes obsolete

Feedback:

A Sprint can be cancelled by the Product Owner when the Sprint Goal becomes obsolete.

Question 12: Who is accountable for managing the items in the Product Backlog?
Options: 1. Product Owner 2. The complete Scrum Team 3. Scrum Master 4. Developers
Correct Answer: 1. Product Owner
Feedback: The Product Owner is the sole person accountable for managing the Product Backlog.

Question 13: During an ongoing Sprint, the CEO of the company asks one of the Developers to add a very important item to the current Sprint. What should the Developer do?
Options: 1. Add the item to the current Sprint without any adjustment 2. Add the item to the Sprint and drop an item of an equal size 3. Add the item to the next Sprint 4. Inform the Product Owner so that he/she can work with the CEO
Correct Answer: 4. Inform the Product Owner so that he/she can work with the CEO
Feedback: For Product Owners to succeed, the entire organization must respect their decisions. These decisions are visible in the content and ordering of the Product Backlog, and through the inspectable Increment at the Sprint Review. The Product Owner is one person, not a committee. The Product Owner may represent the needs of many stakeholders in the Product Backlog. Those wanting to change the Product Backlog can do so by trying to convince the Product Owner.

Question 14: Who is responsible for delivering Done increments?
Options: 1. The Scrum Team as a whole 2. The Developers 3. The Product Owner and the Scrum Master 4. The Product Owner and the Project Manager
Correct Answer: 1. The Scrum Team as a whole
Feedback: The entire Scrum Team is accountable for creating a valuable, useful Increment every Sprint. The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. The moment a Product Backlog item meets the Definition of Done, an Increment is born.

Question 15: Which of the following events may bring about a change in the Product Backlog? Choose all that apply.
Options: 1. Changes in the Scrum Team 2. Changes in the business requirements 3. Changes in the market conditions 4. Changes in technology
Correct Answer: 2. Changes in the business requirements 3. Changes in the market conditions 4. Changes in technology
Feedback: Changes in business requirements, market conditions, or technology may cause changes in the Product Backlog.

Question 16:

Which of the following roles ensures that the Scrum Team adheres to the Sprint and causes the removal of any impediments to the Scrum Team's progress?

Options:

1. Product Owner
2. Product Manager
3. Scrum Master
4. Project Manager

Correct Answer:

3. Scrum Master

Feedback:

The Scrum Master is a servant leader who ensures that the team adheres to the Sprint and causes the removal of any impediments to the team's progress.

Question 17:

During the Sprint Planning, the assigned workload is getting greater than the team's capacity. Which of the following actions should be taken? Choose all that apply.

Options:

1. Cancel the Sprint
2. Ask the Developers to work overtime for this Sprint and promise that it won't happen again
3. Start the Sprint and recruit additional Developers
4. Collaborate with the Product Owner and remove or change items
5. Alert the Product Owner, start the Sprint and monitor burn-down

Correct Answer:

4. Collaborate with the Product Owner and remove or change items
5. Alert the Product Owner, start the Sprint and monitor burn-down

Feedback:

The Developers would need to collaborate with the Product Owner to either remove or change the items of the Product Backlog. The Developers can also alert the Product Owner, start the Sprint and monitor the burn-down rate.

Question 18: Who determines how much of the Product Backlog will be selected for the Sprint?
Options: 1. Scrum Master 2. Product Owner 3. Developers 4. Scrum Team
Correct Answer: 3. Developers
Feedback: Through discussion with the Product Owner, the Developers select items from the Product Backlog to include in the current Sprint.

Question 19: What are the ways in which the Scrum Master serves the Product Owner? Choose all that apply.
Options: 1. Helping to find techniques for effective Product Goal definition and Product Backlog management 2. Helping the Product Owner create high-value products 3. Helping to establish empirical product planning for a complex environment 4. Planning and advising Scrum implementations within the organization
Correct Answer: 1. Helping to find techniques for effective Product Goal definition and Product Backlog management 3. Helping to establish empirical product planning for a complex environment
Feedback: The Scrum Master serves the Product Owner in several ways, including helping find techniques for effective Product Goal definition and Product Backlog management and helping establish empirical product planning for a complex environment.

Question 20:

Which of the following activities (during a Sprint) would require the participation of the Product Owner? Choose all that apply.

Options:

1. Answer questions from the Developers about items in the current Sprint
2. Provide feedback
3. Run the Daily Scrum
4. Work with the stakeholders
5. Update the Sprint burn-down
6. Prioritize the activities for the Developers

Correct Answer:

1. Answer questions from the Developers about items in the current Sprint
2. Provide feedback
4. Work with the stakeholders

Feedback:

During a Sprint, the Product Owner is expected to answer questions from the Development Team about the items selected for the current Sprint, to provide feedback and work with stakeholders.

Question 21:

The Product Owner's accountabilities can best be described as:

Options:

1. Optimizing the Return on Investment (ROI) and the Total Cost of Ownership (TCO) of the work the Scrum Team does
2. Keeping stakeholders at a distance
3. Directing the Developers
4. Managing the project and ensuring that the work meets the commitments to the stakeholders

Correct Answer:

1. Optimizing the Return on Investment (ROI) and the Total Cost of Ownership (TCO) of the work the Scrum Team does

Feedback:

The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team.

Question 22: Who is accountable for creating a valuable, useful Increment every Sprint?
Options: 1. Product Owner 2. Scrum Master 3. Scrum Team 4. Developers
Correct Answer: 3. Scrum Team
Feedback: The entire Scrum Team is accountable for creating a valuable, useful Increment every Sprint.

Question 23: Which of the following statements are true about Scrum Events? Choose all that apply.
Options: 1. All Scrum events are timeboxed 2. All Scrum events are monitored by the Scrum Master 3. The events are held at the end of a Sprint 4. The maximum durations of the events are fixed
Correct Answer: 1. All Scrum events are timeboxed 4. The maximum durations of the events are fixed
Feedback: All Scrum events are timeboxed events, such that every event has a maximum duration.

Question 24: When does a new Sprint start?
Options: 1. Immediately after the conclusion of the previous Sprint 2. Just before the current Sprint can conclude 3. When the Scrum Master feels that the current Sprint is complete 4. After the Sprint Review has taken place
Correct Answer: 1. Immediately after the conclusion of the previous Sprint
Feedback: A new Sprint starts immediately after the conclusion of the previous Sprint.

Question 25:

Which of the following statements is true about a Sprint?

Options:

1. No changes are made that would endanger the Sprint Goal
2. Quality does not decrease
3. Scope may be clarified and re-negotiated with the Product Owner as more is learned
4. All of the above

Correct Answer:

4. All of the above

Feedback:

During a Sprint no changes are made that would endanger the Sprint Goal; the quality does not decrease; and the scope may be clarified and re-negotiated with the Product Owner as more is learned.

Question 26

What is a Sprint Review?

Options:

1. Review of team's activities in the Sprint
2. Review held at the end of the Sprint to inspect the outcome of the current Sprint and determine future adaptations
3. Demonstrations held at the end of the Sprint for the stakeholders to provide feedback
4. Appraise of the work done on the Sprint to either reward or punish the Developers for completing the Sprint

Correct Answer:

2. Review held at the end of the Sprint to inspect the outcome of the current Sprint and determine future adaptations.

Feedback:

The purpose of the Sprint Review is to inspect the outcome of the Sprint and determine future adaptations. The Scrum Team presents the results of their work to key stakeholders and progress toward the Product Goal is discussed.

During the event, the Scrum Team and stakeholders review what was accomplished in the Sprint and what has changed in their environment. Based on this information, attendees collaborate on what to do next. The Product Backlog may also be adjusted to meet new opportunities. The Sprint Review is a working session and the Scrum Team should avoid limiting it to a presentation.

Question 27:
In which case do the Product Owner or Scrum Master attend the Daily Scrum?
Options: 1. Always 2. Never 3. They can choose for themselves 4. When they are actively working on items in the Sprint Backlog
Correct Answer: 4. When they are actively working on items in the Sprint Backlog
Feedback: The Daily Scrum is a 15-minute event for the Developers of the Scrum Team. If the Product Owner or Scrum Master actively works on items in the Sprint Backlog, they participate as Developers.

Question 28:
When can the Developers volunteer to own a Sprint Backlog item?
Options: 1. A Developer can never own a Sprint Backlog Item 2. Whenever a Developer is able to accommodate more work 3. During the Daily Scrum 4. During the Sprint Planning
Correct Answer: 1. A Developer can never own a Sprint Backlog Item
Feedback: A Developer can never volunteer to own a Sprint Backlog item. The entire Scrum Team is accountable for creating a valuable, useful Increment every Sprint.

Question 29: How many members should there be in a Scrum Team?
Options: 1. Always three to nine 2. Typically ten or fewer 3. Never more than ten 4. Never less than five
Correct Answer: 2. Typically ten or fewer
Feedback: The Scrum Team is small enough to remain nimble and large enough to complete significant work within a Sprint, typically 10 or fewer people. In general, we have found that smaller teams communicate better and are more productive.

Question 30: What are the inputs of the Sprint Planning? Choose all that apply.
Options: 1. Product Backlog 2. Latest product Increment 3. Projected capacity of the Developers 4. Past performance of the Developers
Correct Answer: 1. Product Backlog 2. Latest product Increment 3. Projected capacity of the Developers 4. Past performance of the Developers
Feedback: During Sprint Planning, the Product Owner proposes how the product could increase its value and utility in the current Sprint. Therefore the latest product Increment is an input. Through discussion with the Product Owner, the Developers select items from the Product Backlog to include in the current Sprint. Selecting how much can be completed within a Sprint may be challenging. However, the more the Developers know about their past performance, their upcoming capacity, and their Definition of Done, the more confident they will be in their Sprint forecasts.

Question 31: Which of the following of the statements best describes the Product Backlog?
Options: 1. It is an emergent, ordered list of what is needed to improve the product 2. It provides just enough information to enable a Scrum Team to start the design phase of a product 3. It is baselined to follow change management processes 4. It contains all foreseeable tasks and requirements from which the Scrum Team can develop and maintain a complete project plan
Correct Answer: 1. It is an emergent, ordered list of what is needed to improve the product
Feedback: The Product Backlog is an emergent, ordered list of what is needed to improve the product.

Question 32: What is the maximum duration of a Sprint Review?
Options: 1. Two hours 2. Four hours 3. As long as required 4. One day
Correct Answer: 2. Four hours
Feedback: The Sprint Review is the second to last event of the Sprint and is timeboxed to a maximum of four hours for a one-month Sprint. For shorter Sprints, the event is usually shorter.

Question 33: Who is accountable for establishing Scrum as defined in the Scrum Guide ?
Options: 1. Product Owner 2. Product Manger 3. Scrum Master 4. Developers
Correct Answer: 3. Scrum Master
Feedback: The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide.

Question 34: What is the role of management in Scrum?
Options: 1. Monitor staffing levels of the Developers 2. Monitor the productivity of the Developers 3. There is no role of management described in Scrum 4. Identify and remove people that aren‘t working hard enough
Correct Answer: 3. There is no role of management described in Scrum
Feedback: There is no role of management described in the Scrum Guide.

Question 35:

What are the three empirical Scrum pillars? Choose all that apply.

Options:

1. Transparency
2. Inspection
3. Adaptation
4. Evaluation

Correct Answer:

1. Transparency
2. Inspection
3. Adaptation

Feedback:

Scrum combines four formal events for inspection and adaptation within a containing event, the Sprint. These events work because they implement the empirical Scrum pillars of transparency, inspection, and adaptation.

Question 36:

What is a Sprint Goal? Choose all that apply.

Options:

1. It is the single objective for the Sprint
2. It provides flexibility in terms of the exact work needed to achieve it
3. It is updated throughout the Sprint as more is learned
4. It is the set of Product Backlog items selected for the Sprint

Correct Answer:

1. It is the single objective for the Sprint
2. It provides flexibility in terms of the exact work needed to achieve it

Feedback:

The Sprint Goal is the single objective for the Sprint. Although the Sprint Goal is a commitment by the Developers, it provides flexibility in terms of the exact work needed to achieve it.

The Sprint Backlog is composed of the Sprint Goal (why), the set of Product Backlog items selected for the Sprint (what), as well as an actionable plan for delivering the Increment (how). The Sprint Backlog (not the Sprint Goal) is updated throughout the Sprint as more is learned. If the work turns out to be different than they expected, they collaborate with the Product Owner to negotiate the scope of the Sprint Backlog within the Sprint without affecting the Sprint Goal.

Question 37:
What contributes to the value of an Increment? Choose all that apply.
Options: 1. Sum of the value of all the Product Backlog items completed during a Sprint 2. The value of the Increments of all previous Sprints 3. The list of Product Backlog items selected for a Sprint 4. How the Product Owner proposes to accomplish the Sprint
Correct Answer: 1. Sum of the value of all the Product Backlog items completed during a Sprint 2. The value of the Increments of all previous Sprints
Feedback: The value of an Increment is the sum of the value of all the Product Backlog items completed during a Sprint and the value of the increments of all previous Sprints.

Question 38:
Which of the following Scrum roles selects the items from the Product Backlog to be included in the current Sprint?
Options: 1. Product Owner 2. Scrum Team 3. Scrum Master 4. Developers
Correct Answer: 4. Developers
Feedback: Through discussion with the Product Owner, the Developers select items from the Product Backlog to include in the current Sprint.

Question 39:
Which of the following statements is true about the Product Backlog?
Options: 1. Ordered list of everything that might be needed in the product 2. Single source of requirements for any changes to be made to the product 3. It is never complete 4. All of the above
Correct Answer: 4. All of the above
Feedback: The Product Backlog is an emergent, ordered list of what is needed to improve the product. It is the single source of work undertaken by the Scrum Team.

Question 40:
The Product Backlog is dynamic in nature.
Options: 1. True 2. False
Correct Answer: 1. True
Feedback: The Product Backlog is an emergent, ordered list of what is needed to improve the product.

Question 41:
Which one of the following statements is true?
Options: 1. Inspection enables Transparency 2. Inspection enables Adaptation 3. Transparency enables Adaptation 4. Adaptation enables Transparency
Correct Answer: 2. Inspection enables Adaptation
Feedback: Transparency enables inspection. Inspection without transparency is misleading and wasteful. Inspection enables adaptation. Inspection without adaptation is considered pointless. Scrum events are designed to provoke change.

Question 42: What does Scrum rely on?
Options: 1. Transparency 2. Demands 3. Decisions 4. Risks
Correct Answer: 1. Transparency
Feedback: The emergent process and work must be visible to those performing the work as well as those receiving the work. With Scrum, important decisions are based on the perceived state of its three formal artifacts. Artifacts that have low transparency can lead to decisions that diminish value and increase risk.

Question 43: Who modifies the Sprint Backlog?
Options: 1. Developers 2. Scrum Master 3. Project Manager 4. Product Owner
Correct Answer: 1. Developers
Feedback: The Sprint Backlog is a plan by and for the Developers.

Question 44:

Which of the following statements are true about the Sprint Retrospective? Choose all that apply.

Options:

1. Discusses what went well during the Sprint
2. Identifies impediments to development for removal
3. Occurs after the Sprint Review and prior to the next Sprint Planning
4. A four-hour timeboxed event for one-month Sprints

Correct Answer:

1. Discusses what went well during the Sprint
3. Occurs after the Sprint Review and prior to the next Sprint Planning.

Feedback:

During the Sprint Retrospective the Scrum Team discusses what went well during the Sprint, what problems it encountered, and how those problems were (or were not) solved. The Sprint Retrospective occurs after the Sprint Review and prior to the next Sprint Planning. It is timeboxed to a maximum of three hours for a one-month Sprint. For shorter Sprints, the event is usually shorter. Identifying impediments is part of the Daily Scrum.

Question 45:

Of which parts does a Sprint Backlog consist? Choose all that apply.

Options:

1. Sprint Goal
2. Product Goal
3. Product Backlog items selected for the Sprint
4. Plan for delivering the selected Product Backlog items

Correct Answer:

1. Sprint Goal
3. Product Backlog items selected for the Sprint
4. Plan for delivering the selected Product Backlog items

Feedback:

The Sprint Backlog is composed of the Sprint Goal (why), the set of Product Backlog items selected for the Sprint (what), as well as an actionable plan for delivering the Increment (how).

Question 46:

Which of the following Scrum Team members collaborate to refine the Product Backlog?

Options:

1. Scrum Master and Developers
2. Scrum Master, Product Owner and Developers
3. Product Owner and Developers
4. Scrum Master and Product Owner

Correct Answer:

2. Scrum Master, Product Owner and Developers

Feedback:

Product Backlog items that can be Done by the Scrum Team within one Sprint are deemed ready for selection in a Sprint Planning event. They usually acquire this degree of transparency after refining activities. Product Backlog refinement is the act of breaking down and further defining Product Backlog items into smaller more precise items. This is an ongoing activity to add details, such as a description, order, and size.

During Sprint Planning, the Scrum Team may refine Product Backlog items, which increases understanding and confidence.

Question 47:

Which of the following roles is responsible for the estimates in the Product Backlog?

Options:

1. Product Owner
2. Scrum Master
3. Developers
4. The complete Scrum Team

Correct Answer:

3. Developers

Feedback:

The Developers who will be doing the work are responsible for the sizing. The Product Owner may influence the Developers by helping them understand and select trade-offs.

Question 48:

Which role(s) is/are planning the work needed to create an Increment that meets the Definition of Done?

Options:

1. Developers
2. Developers and Product Owner
3. Product Owner
4. Developers, Product Owner and Scrum Master

Correct Answer:

1. Developers

Feedback:

For each selected Product Backlog item, the Developers plan the work necessary to create an Increment that meets the Definition of Done. This is often done by decomposing Product Backlog items into smaller work items of one day or less. How this is done is at the sole discretion of the Developers. No one else tells them how to turn Product Backlog items into Increments of value.

Question 49:

How much work should the team plan on spending on a particular Product Backlog item?

Options:

1. As determined by the Definition of Done
2. Design and development
3. Design, development and testing
4. Design, development, testing and documentation

Correct Answer:

1. As determined by the Definition of Done

Feedback:

The team should spend as much as determined by the Definition of Done, on a particular Product Backlog item.

Question 50:
Which is NOT one of the Scrum Values?
Options: 1. Commitment 2. Focus 3. Transparency 4. Respect
Correct Answer: 3. Transparency
Feedback: Successful use of Scrum depends on people becoming more proficient in living five values: Commitment, Focus, Openness, Respect, and Courage. Transparency is one of the three empirical Scrum pillars, although there is a close relation to the Scrum Value of Openness.

Question 51:
Which part of the Sprint Backlog relates to the question "Why is this Sprint Valuable"?
Options: 1. Sprint Goal 2. Set of Product Backlog items selected for the Sprint 3. Actionable plan for delivering the Increment 4. Product Goal
Correct Answer: 1. Sprint Goal
Feedback: The Sprint Backlog is composed of the Sprint Goal (why), the set of Product Backlog items selected for the Sprint (what), as well as an actionable plan for delivering the Increment (how).

Question 52: Each Scrum artifact contains a commitment to ensure it provides information that enhances transparency and focus against which progress can be measured. Which commitment is related to the Product Backlog?
Options: 1. Product Goal 2. Sprint Goal 3. Definition of Done
Correct Answer: 1. Product Goal
Feedback: Each artifact contains a commitment to ensure it provides information that enhances transparency and focus against which progress can be measured: • For the Product Backlog it is the Product Goal. • For the Sprint Backlog it is the Sprint Goal. • For the Increment it is the Definition of Done.

Capgemini Academy's professionals offer what people in IT need. Our professionals have a keen eye for motivation, talent and are aware of specific contexts and circumstances. They move people to move. Programmes and courses that originate from daily experience of our both didactical and substantively strong trainers, light a fire within the individual IT pofessionals. Real life stories of our professionals' experience that tell how to solve problems and work with the people around it, do the rest.

An organization, like ours, helps people and their organizations day by day to get the best out of themselves and each other. We prepare them to defy tomorrow's challenges. We stimulate learning and curiosity. In order for individual IT professionals and their employers, to build better, longer and more intensive relationships. For mutual benefit.

Capgemini Academy. We transform IT-professionals.
